By Aaron: great read, very interesting look from a former soldier's perspective on military driving tactics in war environments. As a US driving instructor I am always looking for relevant information about driving safety and while this book's discussions were not very applicable to civilian environments, I still learned a lot from Deatherage's well-organized book. 3 of 3 people found the following review helpful. Title Says it By Koos deWet: Though geared toward security drivers, or others in constant harm's way, most of this book is valuable advice for any driver. The

author covers the dynamics of vehicle movement, braking, and maneuvering in great detail, enabling any driver to improve his or her driving safety. For those who live in the inner city or other dangerous environment, this book will enhance your safety with tips on how to deal with road rage, attempted cut-offs/roadblocks, and hijacking. A valuable addition to any security professional's library. Also a valuable resource for the average driver who wants to arrive home safe and sound. 0 of 0 people found the following review helpful. Hope I never end up on the roads he discusses, but the book prepares you. Interesting reading even without the driving concerns.

In *Survival Driving*, Deathrage takes the antiterrorist driving lessons he learned from today's war zones and shows you how to adapt them to your situation, whether you are in Baghdad, Beirut, Bogota or Brooklyn. Using straightforward rules, security checklists, photographs and drawings, he teaches you how to prepare a route analysis, including marking maps and identifying choke points and safe havens; recognize likely attack sites for IEDs, rammings, drive-by shootings and overrun attacks; reinforce and maintain your vehicles to withstand attack by selecting the proper armoring, engine, tires, alarms, windows, locks and more; spot surveillance whether it's fixed or mobile; master the driving basics of steering, braking and accelerating, as well as advanced evasive maneuvers such as forward and reverse 180-degree turns and barricade breaching; and scrutinize military or police personnel at roadblocks or accident scenes to tell whether they are real or fake. Whether you are an enlisted man or reservist about to be deployed, a security contractor or businessman stationed overseas or just a daily commuter who travels on some dangerous roads, you owe it to yourself to take this crash course in survival driving.
