Lots of good pictures and identification marks. Well worth buying. Packaged well and arrived when expected. 0 of 0 people found the following review helpful. There are 4 Volumes to this Series. By Peggy S. Oba We bought all four volumes and found it mostly contains those items designed for the western market. What was really helpful were the makers' insignias. Also the first part contains a history of Japanese ceramics. Most items in these books do not go over \$100...but then we are in it for fun and not to make a fortune. 0 of 0 people found the following review helpful. Great Guide By M. Ortmann I love this guide.. I have gained

such a great deal of knowledge from it...

Over 600 photos together with a special section on marks and backstamps, Japanese patent numbers, and trademarks. Ashtrays, bells, candleholders, pitchers, salt and pepper sets, souvenirs, vases, wall pockets, figurines, and much more are included. New sections include Lobster Ware and Japanese Arts Crafts-style vases. **AUTHOR BIO:** Carole White is the author of a four-volume series on Made in Japan Ceramics. She also wrote Collector's Guide to Lunchboxes and Glass Ceramic Baskets. **REVIEW:** This book updates information on a range of ceramics made in Japan. An introductory discussion of maker's marks provides illustrated examples while chapters organized by item type, from bookends to condiment sets and cigarette items, makes for quick reference. It is the perfect book for collectors of Made in Japan ceramics, and is a perfect addition to the three-volume series by the author.
