**Charlie MacK : The Encyclopedia of Matchbox Toys: 1947-2001** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Encyclopedia of Matchbox Toys: 1947-2001:

About the last one third of the encyclopedia is organized in a manner that obviously suits the author but makes it very difficult to find all the toys that came out in 1953 for example. You can find a group of fire trucks issued from say 1951 to 1963 and the pages to find the pictures all listed out and another list for volvo for certain dates and the pages to find each one scattered throughout. Not the organization that I expected but lots of nice pictures. 2 of 3 people found the following review helpful. Best reference for Matchbox By David W. Williamson Charles Charles Mack makes a beautiful and comprehensive book. It is simply the best. Make sure you get the latest edition. I have been a collector of Matchbox for 47 years and rely on this

author's information. You will be happy with your purchase. Thank you. Mack makes a beautiful and comprehensive book. It is simply the best. 5 of 6 people found the following review helpful. Matchbox book By Robert C.

Rowland While this may be a good purchase for someone who has never purchased one of Mack's books before, it was very disappointing for me. Essentially, this was just a reprint of the previous edition. Little to nothing new was added beyond the cover photos. Should have saved my money.

It's all here! Pictured and listed in this massive volume, now in its fourth edition, are fifty-four years' worth of toys produced between Matchbox's founding in 1947, and 2001, including their popular diecast vehicles, playsets, dolls, plastic kits, robots, and ephemera. The international scope of Matchbox toys is illustrated in catalogs and on boxes and labels printed in a dozen languages. Certain toys have been made for sale in specific countries or to promote specific companies or products. In 1982 the international numbering system on miniatures changed. The result of all these variables is a fascinating and infinite variety of Matchbox toys. In the largest volume about Matchbox Toys ever published, 2,447 color photos illustrate nearly all of Matchbox's vast line. Helpful captions and a price guide make this an essential part of every collector's library.

About the Author Charlie Mack is one of the world's foremost authorities on Matchbox Toys. Born in Middletown, Connecticut, in 1956, he has lived in Durham, Connecticut, his entire life. Charlie grew up at a time when Matchbox toys were just beginning to gain popularity in the United States so, of course, he spent a great deal of time playing with them. By the age of eleven, he decided to start collecting them on a more serious level. It took nearly a decade to gather his first thousand pieces. Soon after that, though, his collection grew at a faster rate. He has accumulated what is probably the world's largest collection of a single toy brand, with over 30,000 items. Charlie started the Matchbox USA Club back in 1977 as a local off-shoot of American International Matchbox. The club celebrated its 35th anniversary in 2012, with over 400 members worldwide. In 1992, Charlie opened up part of his home as the Matchbox Lesney Toy Museum; his collection is housed in seven individual rooms. Charlie gladly takes visitors through by appointment at no charge. He has written four previous volumes on Matchbox, all incorporated here, along with new materials, in one massive volume.
