It is truly a beautifully presented and wonderfully photographed collection of jewelry based on the animal forms. All things sparkly and not. Each page wants to make me linger and move on to see what else is in store for me. I cannot recommend this book more highly to people who love to see, wear or make jewelry.0 of 0 people found the following review helpful. MORE FOR IT!

A showcase of the most spectacular examples of animal motifs in jewelry by master jewelers from America and Europe. The depiction of animals in art goes back to prehistoric cave paintings; and the early history of jewelry, from ancient Egyptian scarabs to Renaissance pendants, shows abundant examples of animal imagery. In the nineteenth century a new group of designers, seeking to satisfy the growing middle class's appetite for jewels, revived the Egyptian and Etruscan styles. Animals of all sorts were incorporated: birds, mammals, insects, reptiles, and fish. Prominent houses such as Fouquet, Fontenay, Falize, Fabergé, and Tiffany all produced a spectacular array of animal jewels that are much prized today. Design developments throughout the twentieth century? Art Nouveau, Art Deco, and those that followed? contributed impressive animal jewelry, from Lalique's intricate insects to Cartier's panthers, from Boucheron and Van Cleef Arpels to the sophisticated imagery of Verdura. This book examines in detail the denizens of this jeweled menagerie. Great imagination and technical skill have gone into the fashioning of these precious objects, which exhibit not only meticulous craftsmanship but also grace, humor, and refinement. Over 300 photographs in full color
