Like any field of collecting and enjoying antiques, there are numerous books on the market to wade through. The Arts and Crafts movement also gets blanket coverage by a deluge of 'style' books on home interiors, exteriors and so on. This book is a must have for all AC enthusiasts in terms of providing a quick yet comprehensive look at the movement, collecting subgroups, the top makers, and the range of pieces and prices. The book does not however provide any in-depth coverage of the range of more affordable and more widely available pieces that most people will come across in their antique hunting. Rago is the expert on the high-end and this book is focussed as such. As a reference, it is one to own. I look forward to his newest book due summer '05.

The Official® Price Guide to American Arts Crafts is the one-volume encyclopedia to help you identify and evaluate your entire Arts Crafts collection. Written by David Rago and Bruce Johnson, two of the most respected experts in the Arts Crafts field, this indispensable book is packed with:

- Period names like Gustav Stickley, Limbert, George Ohr, Grueby, Fulper, Rookwood, Dirk Van Erp, Roycroft, Gustave Baumann, and many, many more.
- Detailed descriptions, price listings, and brief histories of every kind of object, artist, and major manufacturer of furniture, pottery, metalware, lighting, textiles, and color woodblock prints.
- Crucial information on how to easily identify and date hundreds of Arts Crafts pieces.
